COURSES AND REQUIREMENTS

Regarding admission to the College of Arts and Sciences, the General Information Number should be consulted.

Two courses are offered in the College of Arts and Sciences, one leading to the degree of Bachelor of Arts, the other leading to the degree of Bachelor of Chemistry.

Neither degree will be conferred upon any student who has not been in residence at Cornell University during the last two terms preceding graduation, nor upon any student who has not been in residence at least two terms in this College, and in this College only.

A student who does not pass twelve hours in any term, with a grade of C or better in at least six of the twelve hours, will be either dropped or placed upon probation. The same penalties may be imposed on students of this College who, having registered in the Summer Session, do not pass four hours of their Summer Session registration, with a grade of C or better in at least two hours.

A student's general record may be so unsatisfactory that the Faculty will refuse him permission to continue in the College even though he has passed twelve hours in the preceding term.

A student failing in the last term of his senior year to pass twelve hours—or, if in a summer session, four hours—may not be recommended for his degree except under such conditions and at such time as the Faculty may designate.

REGISTRATION

Students will file their study cards at the office of the Dean in accordance with instructions issued at the time of registration.

With the consent of the Dean and the approval of his adviser, a student may alter his list of courses during the first six days of instruction. Thereafter, no student will be permitted to cancel his registration for any course in which he is registered, unless he shall previously have obtained from the Dean authorization to do so on the ground of ill health, or for other reasons beyond the student's control.

THE GEORGE C. BOLDT MEMORIAL SCHOLARSHIPS

Mr. George C. Boldt, jr., has created three scholarships of the annual value of five hundred dollars each, as a memorial to his father. These scholarships will be awarded at the close of the junior year to the three male students of the College who shall be considered most deserving of this aid. Applications for these scholarships must be filed in the Office of the Dean before March 15 of the academic year preceding the year for which they are awarded.

THE DEGREE OF BACHELOR OF ARTS

I. REQUIREMENTS FOR GRADUATION

1. Credit for one hundred and twenty hours, of which at least ninety hours must be for courses given in the College of Arts and Sciences. Course 1 in Music may be counted as part of the thirty hours which a student may elect outside the College of Arts and Sciences, but may not be counted as part of the ninety hours required in the College. This rule applies also to Military Science 2 and Hygiene 1, 2, 3, 4, 5, and 6.

2. A grade of C or better in at least sixty of the required one hundred and twenty hours. (See Section IV: Marks.)

3. Election of courses in accordance with Section III, Course of Study.

4. Completion of the work in Hygiene and Preventive Medicine, and in Military Drill or in Physical Training prescribed by the University Faculty. (See pages 80-82).

II. SPECIAL PROVISIONS REGARDING CREDITS TOWARD GRADUATION

5. **In Summer Session.** To obtain credit by means of work done in summer sessions, a student must previously have satisfied the entrance requirements of the College, and must obtain in advance the Dean's approval of his selection of courses. Credit for a maximum of thirty hours, but no more, may be secured in this way.

Credit will be allowed, under the same restrictions, for work done in summer sessions of other universities belonging to the Association of American Universities, by a student regularly registered in this College, but permission to offer such credit must be obtained in advance from the Dean of this College.

6. **Admission to Advanced Standing.** A student admitted to the College of Arts and Sciences from another college of Cornell University, or from any other institution of collegiate rank, will receive credit toward the degree of Bachelor of Arts for the number of hours to which his records may, in the judgment of the Faculty, entitle him. In order, however, to obtain the degree of Bachelor of Arts, he must, as a candidate for that degree, have been in residence at least two terms in the College of Arts and Sciences, and in that college only.

7. **Registration in Two Colleges of the University.** A student who has completed at least ninety hours in courses given in the College of Arts and Sciences may, with the permission of the Faculties concerned, be registered both in the College of Arts and Sciences and also in the Medical College or the Law School. (See paragraph 12, division a.) It should be noted, however, that admission to the Medical College is closely restricted, and that in recent years the Medical College has been able to grant this privilege of double

registration to only a small proportion of the fourth year students of the College of Arts and Sciences who applied and were formally eligible for it. Students who contemplate obtaining the A.B. and an Engineering degree by a combined six-year course, are urged to consult the Dean's Office.

8. **Registration in the College and in the Graduate School.** A student who has satisfied all the academic requirements for graduation may, with the permission of the Graduate School, register both in the College of Arts and Sciences and in the Graduate School.

III. COURSE OF STUDY

9. **Number of Hours.** A student must register in each term for at least twelve hours of work. No student may register for more than eighteen hours in any term except by permission of the Dean. A student who has not attained in any academic year a grade of C or better in a total of fifteen hours of work will not be permitted to elect more than fifteen hours of work in either term of the subsequent academic year. A student on probation may not register for more than fifteen hours in the term of his probation. For registration in a course not in the College of Arts and Sciences, the permission of the Dean of this College and of the Professor in charge of the course must be obtained. (See also paragraph ii under 11c below.)

10. **Prescribed Studies.** Prior to graduation, a student must complete six hours in each of the first two groups listed below and six hours in each of five of the remaining six groups:

1. English and Public Speaking.
2. Foreign Languages.
3. History.
4. Astronomy, Chemistry, and Physics.
5. Biology (including Botany and Animal Biology), and Geology.
6. Philosophy and Psychology, including Educational Psychology.
7. Economics and Government. (For the present, Economics 1, five hours, will be accepted in satisfaction of this requirement.)
8. Mathematics.

11. Underclassmen.

a. *Underclass Requirements.* To attain upperclass standing each student is required to complete, in addition to the first two groups mentioned in paragraph 10 above, at least eighteen hours in five of the remaining six groups. Of these hours, the student is required to take at least twelve, and advised to take more, in his freshman year. Each six hours may be entirely in one division (for example, English six hours), or partly in one and partly in another (for example, English three hours and Public Speaking three hours). The following courses in foreign languages may not be applied in satisfaction of the foreign language requirement: Greek, 1a, 1b; German 1, 1a, 3, 3a; French 1, 3; Spanish 1, 3; Italian 1. College credit gained by ex-

amination at entrance may not be applied in satisfaction of any of these underclass requirements.

These requirements must be completed before a student may begin counting hours in an upperclass group. (See paragraph 12 below.)

b. *Underclass Advisers.* Freshmen and sophomores are under the jurisdiction of the Advisory Board for Underclassmen. Each freshman will be assigned to a member of the Faculty who will act as his adviser during his freshman and sophomore years. The function of the adviser is to assist the student in his choice of studies, to advise him during the term regarding his work, and generally to give him friendly counsel. The approval of the study card and the signature of the adviser must be obtained before the study card is filed at the office of the Dean.

c. *Courses Open to Freshmen.*

i. The following are the courses in the College of Arts and Sciences open to freshmen, except that (1) a student may not register for any of these courses for which he has not satisfied the prerequisites, if any are specified (see announcement under each course); (2) a student may not register for any of these courses for which he has presented an acceptable equivalent at entrance:

ii. Subject to the permission mentioned in paragraph 9, required courses in other colleges in the regular freshman schedule of those colleges may be elected by a freshman in the College of Arts and Sciences, but only after the approval of the Dean of the College and of his adviser has been obtained.

iii. Under exceptional circumstances, a freshman may by petition secure permission from the Advisory Board for Underclassmen to take

courses (including freshman electives in other colleges) in addition to those allowed under i and ii.

d. *Informal Study.* At the beginning of their second year, sophomores not exceeding fifty in number may register for informal study under the general supervision of the Advisory Board for Underclassmen. To each sophomore so registering, three hours of supplementary credit will be given at the end of the term. Applicants for the privilege of informal study will be selected, in the order of their scholastic standing, from those students who have a grade of B or better in one-half the hours they have passed. Students admitted to the privilege may not register for more than four formal courses, and those formal courses shall not total more than fifteen hours. Continuance in the privilege for the second term will depend upon a student's maintaining an average of B in the total number of hours for which he is registered in the first term. For necessary purposes of grading, the mark in these hours of supplementary credit will be considered the same as the student's average, for the term, in the formal courses for which he is registered. Students eligible for sophomore informal study will be notified before registration for the first term.

12. Upperclassmen.

a. *Upperclass Requirements.* When a student has completed sixty hours including the underclass requirements (see paragraph 11a above) he may select an upperclass group. Prior to graduation, he must complete at least twenty hours of work in the group selected, but courses marked with an asterisk (*) may not be counted toward this requirement. With the sanction of his adviser and of the Dean, a student may choose, instead of one of the upperclass groups listed below, a combination of two related groups. A student registered in this College and in another college of Cornell University is excused from ten of these twenty hours. (See paragraph 7.) Upperclassmen should note that they may receive only four hours credit in History 61, French 1 and 3, Spanish 1 and 3, though these are six-hour courses for underclassmen.

b. *Upperclass Advisers.* In choosing his course, an upperclass student must obtain the advice and approval of some professor or assistant professor in his major subject whose signature on the study card must be secured before it may be filed.

c. *Upperclass Groups.*

1. The Classics.
2. Botany.
3. Chemistry.
4. Economics.
5. English and Public Speaking.
6. French and Italian.
7. Geology and Physical Geography.
8. German.
9. History and Government.
10. Mathematics.

11. Philosophy and Education.
12. Philosophy and Psychology.
13. Physics.
14. Animal Biology (Physiology and Biochemistry, Anatomy, Histology, Embryology, Zoology and Entomology).
15. Psychology and Education (including Physical Education).
16. Spanish and Italian.
17. Comparative Study of Literature (with English and Classics).

d. Two plans of *informal study* are open to certain upperclassmen.

i. One plan is an extension, into the junior and senior years, of the privilege also open to sophomores of high scholastic standing (see the paragraph *Informal Study* on p. 14). Informal study of this kind is restricted for the present to fifty of each class, chosen in the order of their scholastic standing, who have an average of B or better for the previous year. Informal study of this kind may not count in fulfillment of the upperclass group requirement.

ii. Upperclass group requirements may be satisfied in part by a second plan of informal study, however, in those departments which provide for such study as a part of the programme of the upperclass group. Informal study in such departments may be applied for by any student who has completed the underclass requirements, and who has at least sixty hours of credit with a grade of B or better in one-half of the hours he has passed. Students may pursue informal study in either the junior or the senior year, or in both years, under the following conditions:

Informal study during the first, or junior, year will consist of specified readings and reports, or of experimentation and problem work, which are intended to furnish the student with opportunities for the expression of initiative in his major field of study. This informal study will be supervised by the student's upperclass adviser, and will entitle him to such credit as his adviser is willing to grant for the work the student has completed, provided that no credit in excess of three hours a term shall be given for informal study in the junior year.

The same plan may be followed in the senior year, again entitling the student to a variable amount of credit, not in excess of three hours a term, for informal work done under the supervision of his adviser.

In a department, or departments, constituting an upperclass group in which there is a seminary meeting at least once a week for the purpose of giving tutorial assistance to the students accepted for informal study, the amount of credit obtained by such students may be extended to a maximum of six hours a term during the senior year; provided that, at the close of his senior year, and before his adviser reports credit for this informal work, the student shall have passed successfully a comprehensive examination in the field of study of his upperclass group. (For the degree of Bachelor of Arts with Honors, see page 16.)

Theses. During his last two terms of residence any candidate for the degree of Bachelor of Arts may, with the permission of the

Dean, arrange with the department in which he is taking his principal work to write a thesis which, if accepted, shall entitle him to not more than three hours of credit a term.

IV. MARKS

13. A, B, C, D are passing grades; E, represents a condition; F, a failure; Z, a course dropped without official cancellation.

14. No credit towards graduation will be given for a course in which a mark of E (condition) is recorded, unless the course be repeated and a passing mark received. A student who has received a mark of E (condition) in any course that is a prerequisite to another course may, at the discretion of the department concerned, be regarded as having satisfied the prerequisite; or the department concerned may, before regarding him as having satisfied the prerequisite, require him, by re-examination or otherwise, to remove the condition.

15. A student who, in any course, has received a term mark of "incomplete" or of "absent" may, with the consent of the Dean, and upon payment of the fee required by the University, be permitted to remove the mark, by examination or otherwise, as the department concerned may direct. A mark of incomplete or of absent may not be removed later than registration day of the third term of attendance in the University, dating from the time the course was taken in class, and no more than one attempt at removal will be allowed.

16. A student who has received a mark of E, of F, or of Z in any course, must re-register for it if he desires to secure credit for the course. (See paragraph 14 for E.)

BACHELOR OF ARTS WITH HONORS

The degree of Bachelor of Arts with Honors in the field of a student's upperclass group will be conferred upon those students who, in addition to having completed the requirements for the degree of Bachelor of Arts, shall have (1) received a grade of B or better in at least half of the courses for which they have been enrolled; (2) passed with distinction a thorough comprehensive examination in the field of study in which their upperclass group requirement was satisfied; (3) been recommended for the said degree by the department or departments in which their work for the upperclass group was done.

THE DEGREE OF BACHELOR OF CHEMISTRY

The degree of Bachelor of Chemistry will be awarded to those who have satisfactorily completed the following curriculum and the requirements prescribed by the University in Hygiene and Preventive Medicine and in Military Drill or in Physical Training.

Students who do not present, on entrance, at least two units of French and two units of German, will be required to make up the deficiency before the beginning of the junior year. This may not be done, except with special permission of the Department, by taking University courses in French or German during the academic year.

THE HONOR CODE IN EXAMINATIONS

Under a plan formulated by a joint committee of faculty and students, adopted by the Faculty of the College of Arts and Sciences, and approved by the University Faculty, a tribunal composed equally of faculty members and students, with the Dean as Chairman, has been set up to hear and dispose of cases of dishonesty and disorder in courses conducted by the College of Arts and Sciences. To this Honor Committee of the College of Arts and Sciences it is declared the duty of members of the faculty and of members of the student body to report observed cases of fraud and offences against good order. Every student of this College receives, at registration, a copy of the rules according to which it is expected that examinations and other academic exercises in Arts and Sciences will be conducted.

ECONOMICS

Course 1 or its equivalent—e. g., courses 81 and 82 for mature or graduate students—must be completed before any credit may be obtained toward the upperclass requirement.

To satisfy the upperclass requirement in Economics a student must complete (1) Course 1 or its equivalent; (2) a minimum of five hours in each of three groups other than the introductory group; (3) twenty hours in Economics, completed after attaining upperclass status.

A student who is excused from ten of the required twenty hours in an upperclass group must complete (1) course 1 or its equivalent; (2) a minimum of five hours in

each of two groups, or three hours in each of three groups other than the introductory group; (3) ten hours in Economics completed after attaining upperclass status.

Certain courses in Agricultural Economics may be counted in partial fulfillment of the major requirement in Economics, but in no case may more than six of the required twenty hours be allowed for such courses; and, in each case, the specific approval of the adviser must be obtained before credit for such courses may be counted toward the upperclass requirement. Students must secure the approval of their adviser, and the permission of the Dean and of the instructor in charge of the course, before they may register for courses given outside the College.

The attention of students intending to elect Economics as their upperclass group is directed to the following courses in Government, History, and Philosophy. *History of Political Thought; English History, American History, Economic History of the United States, History of Modern Europe, The Intellectual History of Modern Times; Problems of Philosophy, History of Philosophy, Social and Political Ethics.*

Students who wish to continue the study of Physics after completing one of the introductory courses are advised to consult with some member of the Physics Faculty, who will be glad to advise them regarding the courses best suited to their needs or interests. Those who desire to follow Physics as a profession, either in education or in research or testing laboratories, should also consult with the department concerning the opportunities in the field.

In general, those who intend to specialize in Physics should take Courses 60, 61, and 62, which are prerequisite to more advanced work. For those who do not wish to specialize, but who have a general interest in the subject, elections from Courses 55, 60, 61, 62, 611, 621 and 622 are suggested.

Students expecting to elect Physics for their upperclass group are advised to complete Mathematics 4 or its equivalent before the beginning of the junior year.

Examinations for those who were unavoidably absent from either term examination in courses 3 to 6, and for those who have conditions to make up, will be held on Monday, September 23, 1929 at 10 a. m. in Rockefeller A. Similar examinations in connection with courses 28 to 65 will be held in Rockefeller A at 2 p. m. on the same day.
